

IN THE CLAIMS

This listing of claims replaces all prior listings and versions of the claims in the present application.

Listing of Claims:

Claims 1-28 (Canceled).

Claim 29 (New): An electromagnetic shielding structure, comprising:
a conducting element;
a transparent tie sheet mounted on said conducting element;
a first transparent substrate mounted on said tie sheet;
a backing sheet contacting a back portion of said conducting element;
a plastic sheet which contacts said backing sheet;
a second transparent substrate which contacts said plastic sheet; and
an electrical connection member connected with said conductive element wherein at least one of said transparent tie sheet, said backing sheet, said plastic sheet and said second transparent substrate is set back with respect to at least one free edge portion of said substrate so as to form an exposed portion within which said electrical connection member is positioned and wherein said connection member comprises a substantially flat conductor which is connected to said exposed portion of said conducting element.

Claim 30 (New): The electromagnetic shielding structure as claimed in claim 29, wherein only said transparent tie sheet is set back to form said exposed portion.

Claim 31 (New): The electromagnetic shielding structure as claimed in claim 29, wherein each of said backing sheet, said sheet of plastic and said second transparent substrate are set back to form said exposed portion.

Claim 32 (New): The electromagnetic shielding structure as claimed in claim 29, which comprises a frame within which said electrical connection member is positioned.

Claim 33 (New): The electromagnetic shielding structure as claimed in claim 29, wherein an enamel covering is provided on one of substantially all of a peripheral portion of the first substrate and a free part of said first substrate.

Claim 34 (New): The electromagnetic shielding structure as claimed in claim 29, wherein the conducting element comprises a silver-based metal layer.

Claim 35 (New): The recapt structures claimed in claim 29, where in the conducting element comprises a mesh of conducting wires.

Claim 36 (New): The structures claim in claimed 29, wherein the flat conductor comprises a bus bar or a conductive foam tape.

Claim 37 (New): The structures claimed in claim 29, wherein the backing sheet is made of a plastic, PET, or material based on one of the following materials: Polycarbonate, polymethyl (meth) acrylate, polyethersulfone, polyether-ketone and styrene-acrylonitrile compolymers.

Claim 38 (New): The structures claimed in claim 29, wherein the tie sheet, the additional sheet, and the covering sheet are made of one of a plastic, polyvinyl butyral, polyurethane, or ethylene-vinyl acetate.

Claim 39 (New): The structures claimed in claim 29, the structure being joined to a front face of a display, and connected to an electrical ground of the display.
